Our services

Concept and Budget

We begin by developing an art concept that clearly illustrates the vision and intent behind the artworks. This phase includes the creation of a preliminary budget that outlines the estimated costs for the overall project.

Design Development

In this stage, we carefully select specific artworks tailored to the project's objectives. We then present the final artworks for client approval, ensuring alignment with your vision and goals.

Procurement & Manufacturing

Once approved, we initiate the purchasing and manufacturing processes. Our team diligently monitors the progress of commissioned artworks and custom artifacts, ensuring quality and timeliness throughout.

Installation

The successful placement of each artwork is crucial to the overall impact of the art program. We pay meticulous attention to the installation process, ensuring that each piece is positioned perfectly to enhance the space.
